Staff Progress Report

Project New Administration Building for the Municipality of Argyle
Date 24th June 2019

Hello team,

There's not much to report from last week as our team continues to progress the drawings for Class B estimate.

Our electrical engineer was able to reduce the number of exterior light poles to two units, one in the visitor parking and one in the staff parking. The lights will be on 20ft poles for maximum exposure. This will result in cost savings and keep the parking area sufficiently lit. We have attached two images to illustrate this.

This week we will continue to coordinate and review drawings from our M&E and structural consultants and will provide you with an update at the end of the week.
