Dear Evan Nemeth,

I am pleased to write this letter to advise that at our most recent meeting, Council unanimously approved the request for a letter of support for the residential retrofit funding application.

We understand the importance of using less energy as we are the first Net-Zero municipal building in Canada. This is a great opportunity for our area, and we are happy to support.

As requested, please also note that this letter includes a \$1,200 in-kind contribution for staff hours to reflect any required data requests.

Thank you to you and the WREN for initiating projects, such as these that encourage innovation in Southwest Nova Scotia.

Sincerely,

A handwritten signature in black ink, appearing to read 'Danny Muise'.
