Re: Assessment of The Impact of Climate Change to Our Communities

Dear Warden ^{Danny} Muise,

Following the publication of a report in 2021 by the Centre for Marine Applied Research called "Assessing Climate Change Vulnerability of Seafood Industry-Dependent Communities in Nova Scotia", the Municipality of the District of Shelburne has initiated an assessment of the impact of climate change to our communities. As such, we are identifying specific vulnerabilities to our region and beginning to discuss possible future marine research projects that may be able to support our communities in the face of climate change in the years to come.

We are requesting that you authorize your Chief Administrative Officer to participate on an advisory committee to assist our municipality in guiding possible future marine research projects.

Thank you for considering our request.

Sincerely,

Warden Penny Smith
